He was an bronest old fellow, and was looked upon as somewhat of a "character" by Trugality he managed to the possessed of considerable wealth, which he left to the children of a respectable white family

Canadian Pacific railway authorities have offered interior farmers the exceptionally low rate of \$4 per ton on all farm produce they may wish to ship to Moody from Savona, Ashcroft, Spencer Bridge and Lytton

They also offer the same rate on ore shipped out for the purpose of assay or working This would enable ore to be placed in San Francisco at about \$6 12 per ton

FRAMINATOR OF THE SOCIALISTS

I CADON, Feb. 24—Hearing in the case of Burns, Hyndman, Chamblon, and Williams, socialistic leaders, accessed by the authorities of baving inclied the recont riots at Tradigar aquare and Hyde park, was resumed to-day. The session was devoted principally to hearing the testimony of newspaper reporters as to the exact language used by the defendants in their minimumators speeches. Hyndman, hefore the proceedings were formally optical, entered a complaint against the aditor and proprietors of Phich and acked for their arrest. He alleged they had attempted to excite the public against the defendants and prejudge their trial by publishing a picture of Mr. Punch in the act of publicly hanging them, in this way suggesting to the people the form of vingeance to inflict upon the defendants. The magnetizate declined Hyndman's request.

Land Jumpers at Milton, Oregin-A Secondrel who Descrits Lie Mother C imes Accidents

and Minor Mention.

Burgiaricus tramps in est Gervais, Marion The remains of the unfortunate little girl, Til-

The remains of the unfortunate little girl, Til lie Jeffers, who was drowned white crossing Milcreek, at The Dalles, several days since, was found near the mouth of that stream Tuesday. Curry county exchange Although it was de p ded by the bridge commissioners late in the bridge commissioners late in the bridge conditions of the proposed Elk river bridge according to plans furnished to contractors not laker than February 1, and to make the award early in March, we have not yet heard anything of the matter. Perhaps the plan which was to be submitted by the Portland Iridge engineer bas not arrived or, arriving, was not satisfactory to the board.

Quite a britle ripple of excitament has been started around Milton by the acts of land jumpers. They went upon the land of John Frazier and proceeded to unload their lumber for a constantly. We frazier, has a warranty deed fir the land, which was patented some twelve or fourteen years ago to Win Nichols by the state of Oregon. It is runored that a number of squattors have gone upon fir. Blalock's big and. There is bound to be serious trouble over the land question in the part of the country, and careful legislation should be enacted to goard against "jumpers," for they are generally a bad lot.

W. H. H. Grant, an agent of the Traveler s

guard against "jumpers," for they are generally a bad lot.

W. H. L. (straint, an agent of the Traveller's Accident Insurance company, was arrested at Engene City the other day for an assemble alleged to have been committed upon Mr. (arrest, a hotel keeper at Albany The Albany Hendbler electing the fact gives no cause of the quarrest netween the two men, except to say thick arrest estured to insure with Grait. It is alleged that Grant, who is a very large man, struck (acrest in the face, knocking him several fact and in the cling an unity brusse a wall the right ejectrant was brought back to Albany, where he pended guilty and was fine 1510 and costs

Modest Claim of the Altany Democracy
Albany H raid:
It has leaked out that the democrats of this
city aspired to capture a bug shock of glory at
the coming electron. They claim to have himber
right at bome to fall all the state offices, and have the coming electron. They claim to have limber right at bome to fill all the state offices, and have "set up" the entire state ticket. It was decided at first to give the office of superintendent of public liestraction to an Fastern Oragon man but at the last assemblage of the Albany Tain many ring at their healt unders around the stroy of a First street gracery store, after destroying an unusual air outs of peanule it was ruled otherwise and the ticket now stands at follows.

IROM ME EUCERE SLMPLE

VANCOLER, W. T., Feb. of

TO THE EDITOR OF THE ORREON TARE

Alluding to the Bittorial criticism of myself in
toon issue of twelvy, I beg leave to suggest that
you were presibly not fully advised as to what
testispied at the Vancouver in issue no time. The
sentiment of that meeting was unan mously in
favor of supporting the laws at this place so i
in condemning the unlawful acts of certain
people at other pieces. The sentiment was also
unanimously against all attempts to interfore
with the freedom of the press of Preedom i
speech by a "horcott," by newspayer dominica
tion or otherwise.

There was no "hade" against Gov Sintre,
as your informant said, on the contrary, the
people of Vance uver, including mysel, are very
friendly to that gentleman, and we have resolved in the mest emphale manner that we
will stand by him in enforcing the laws of the
land against anybody and corrybody who rebels
against them, under any pretext whatever.

The only difference be ween those who constituted the miss meeting referred to was as to
the necessity for declaring martial law at Sent
the I maintained that the people of the cities
of Washington to riftory were able to enforce
their laws by the ordinary process, and
that the declaration of maintail law
at Seattle was not necessary. Other
gentlemen presend affir ad with my and my
resolution was declared lost by a vite of Moshington to reflect
this motining was then passed without a dissenting voice, and a resolution to stand by the
heriff in all efforts to uploid the laws, unfor
all circum stances and at all hizards, was also
passed without a desenting voice.

My resolutions it volving censure of those with
were tesponshile or declaring martal law of
cota vote (1), and I have sin elemental and
cota vote (1), and I have sin elements.

MANNAL IN ORE 100

Occupies to did a commending position with everwidening curie of influence. Thirty-sear sign when this lidge first received charter, it is members of the craft, resident Oregon, were few infeed. But the hand they gathered here in Oregon City has been the book who tenday bear up the Masonic fix futters. What wondrous changes the survival retirent of this lodge have witnessed since the first meeting. In the American changes the survival retirent of this lodge have witnessed since the first meeting. In the time the little band who as are will us late seen Oregon become a had worthly of place in the roll of states. No long so remote it in the tennalisher of our nation to months of weary trave are required to read these she had part in the relief states. No long so remote it in the tennalisher of our nation to months of weary trave are required to read these she had part in the delication to hight and a single week I with his brethren and friendals are well in the delication to hight and a single week I with his brethren and friendals are were the extrante weak, but now us ylook from these shores of the Occident still to the westword we realise the growth of occupity, and know that far onward around it great Alaska are the eart-spangled flag is the summan the state of the horeident still the timestone of the human tides which have swe around the carth. Our peerless shad has develoed in the little tenture who is the return wave of the human tides which have swe around the carth. Our peerless shad has develoed in the little to the stranger of th

We have seen that there has been a spicial growth in all directions, but in nothing a that growth surpassed that which lies inside to pale of Masoury. The feeble band who first-cured the momorable charter from Missobare grown to be a mighty host, and with each 18 THIS PERROSPICT

ARLINGTON'S ANGER MASONRY.

Rorthern Pacific to a Good Share of the Place

Address of Rev. R. W. Hill, D. D. Deof Eastern Oregon, once y Alkali, Serely Troubled. livered at Oregon City Feb. 32. A Mason who Participates in Acts of Vicience Palse Denty Geth a Title Dad to

fruth. With these its sure supports it is no wonder that the institution has been enabled to wander that the institution has been enabled to enlist in its support good and true men in every ige, and to withstand the storms of turns, and the efforts of inversaries to overthrow it. It maters not what may be the age of Masonry, there is the storm of the storm the efforts of advarsances to everture to the matter not what may be the age of Mesourry, whether we true it to those older mysteries which hele and concealed the truths of tod's caline from the multitude, or whether we find the origin in the middle ages, when modern defiliation was coming to the birth. In any case Mesoury has transmitted to us a system which consinus much to benefit humanity, and confer a blessing upon its votaries. It could not be otherwise than of service to humanity, when we reflect that its cardinal principles are those which have done most for the advancement of dibrit and law. To do good to man, and to seek the uplitting of the race through the exercise of the general aris, and the broad diffusion of truth to those who are worthy to receive it, the has been its aim and this its work. When the pende have felt the myortance of knowledge, and of notic things, it has been an indication, that the striggle has resulted in a votory for the better thements of humanity. It is one of the studences of ethilization that men turn from the puscel of seiths ends and give themes eas to be contemptation of that when is for the

the better elements of humanity. It is ofte of
the evidences of civilization that men turn from
the passall of selbsb ends and give themse resto the contemplation of that which is for the
benefit of the race rather than of the
individual. Masoning has evemplated
this, and has been a leader to
the path of true progress. When the batchires
of error were burning most brightly, leading
men to daraness and gloom, Masoning set on
high the light of truth, and won men to the
"True light" which lightesth to the temple of
Saight we receive its blessed influence. It
can be said, without fear of successful controrery, that it has been always helpful when men
most needed the strong hand of a mightly to wer
to hold them safely mind the temptations which
would true them to error and ungothness. In
the ethica, hours of Furopean history, when
the harts of men failed them, for forr, and
whose with bated breath the wise and good
toked for the overthrow of the institutions on
whose axistence the welfare of civilization was
dependent then it was that Masonin; rave com
fort and hope to those who else would have leapaired. The decrease of a pure these ogy were
so literative and with the dogman of Mass may, hat
for a time leaders of the charch theelf found in
the shelter of the lodge a place for the depical
and afte keeping of many most precume truths
it is within bounds to say that the signated inquity festered by Masoning are added in motus and asle keeping of many most precious truths it's wish bounds to say that the spirit of inquiry festered by Masonry gave saided impetus to the keen birst for knowledge which was a feature of the Middle Age, and it will pertiagus also be admitted by the student of history, that, in the tyted precincts of the lodge, truths were taught, which uttered elsewhere would have been the signal for the exercise of not the hot ros of the acte of fe. To such men as Roger Bacon and Its fellow missites much of the process of the acte of for they opened the putter which have led us to light, and these were the with who light as the highly and these were the went who light and these were the Age.

Occupies to-day a commanding position with an everwidening circle of influence. The irrepeace reason say, when this ledge treat received its charter, the members of the creat, resident for organ, were lew indeed. But the handful has called and the contractions of the creat of t

Of all phases of truth, and the Mason who is searches have laught him to be the truth. Masoury therefole dedicates this hall to Trut... In
the whole round of human life the tenets of
Masonry have a place, and must do their part in
the development and perfection of human character, and when that work falls short of this
ideal of excel ence we who are Masons are certainly not using to the full the advantages
which are put within the reach of the craft.
There never was a time in the history of the
race when it was more necessary to be true to
our highest convictions than the present, for
with the manch of intellect there have been
many things promulgated which are apt to harm
him who does not look a sile sides of wait is
presented. I think that the temptations of this
age are greater than those of an that have hitherso dawned upon humanity, and for this reason
it is necessary to be on guard, lest we be led
into error.

But can it be said that we have an influence
which is religious to its nature. Mason; can

But can it be said that we have an influence which is religious in its nature? Mason; can know no tenets which are divorced from true religion. From the venegast entered apprentice to the Mason who is rewined with years and henors the members of the craft feel the influence and adknowledge the necessity of a pure worship of the creator. Frayer is the Aipi a and fineral of the ritual, and to every great and limportant undertaking in life Masons are taught to invoke the drune bleesing. When Mason; is divorced from true religion it will be a said day for all who love the craft, and should such a time ever come it will be asked the slope of the order which nothing clse can destro?

Ferhaps you will accuse me of propounding a tivelty when it are that Masonry has relations with all sides of tuman life, and as much four weall or wes dispends upon; proper government, it is one of the prilegers of Masonry to Instruct

MONEY SENT OUT OF THE COUNTRY. One great objection raised against the Chihese is that they are sending money out of the country. This is heard on every hand. It is frue. The Chinese do send money out of the chinese than they shoulder in this? We Signify. But are they singular in this? We are all sending money out of the country. That is the interpretation of the figures furnished by bureau of statistics, which show but we are tak ng goods from foreign countries at the sale of \$500,000,000 to \$600,000,000 a year. It is ar dirjing thing to hear an "agitator," dress up in a init of breach goods ordered from a local falor, made up by Chinese and paid for by the dupes of demagney, declaiming against the Chinese for sending money out of the country; and then see him make a bee line for a saloon, stuff his skin full of hot Scotch whisky, and find him again a little later with his head enveloped in wreather of sender the form of presidentials. the season a nate inter with us hear enveloped the wreather of smoke from a foreign-hande or Chinese-made eigen-ettil geing on, as voltibly as his crapdious utterance will allow with his distribe against Chinese for sending money out the country.

of the country.

Therefore, when it comes to send ag money the country the Chinese are not our on! ship rs. The 'agitators' themselves do it, and better men are continually doing it. Even here in tregon, instead of wearing our cwn excelpuo, we take dress goods from Enope; while the Chinaman wears wo lens ! Oregon Lity or cotton drills from I'all River, Our importing houses are full all the time of goods of every description from fore go coun-tries, and shipments of gold to pay for them are Some of the money the Chinese here manage

to save, they do take or send back to thicastin-stead of drapping it in the liquorshops, through which it would be sent to foreign or eastern browries or distilleries. But they get no money here unless they work for it—unlike the learners of the crucade against them, who neither toil ebin, yet dress better (at the axpens duree) than Solomon ever did, and have manager for whishly heades. When a Chinaman digs up stump and gets a dollar for it he may iar, or part of it, out of the country but the place where the stump stood is there fer, that's circlain, and the value of the land is in-creased id the full amount of the dollar at least, by the transaction. Many Chinese have worked rears in our canneries. The wave have earned are their cym, and no don's they have seathaway a considerable portion of them to Chim. But the product of their laber, in the salmon nack of every season, has brought ten deliars into the country for every deliar they have sent but of it. This salmon pack, besides, creates a demand for lumber, and luthishas work to like box factories, makes freights for river raif ocean vestels, commissions for merchanis and business for insurance companies: and it even goes far to support the vilest dag-garies of our river towns, though every daggary becomes a center of mab violence against the money to foreign countries is as

eat a fin we know of nobody who is so free from 'it us to entitle him to cast the first stone at the Chinese. From Germany, from Lesland, from Semplinavia, people are coming to Amer-ica by tens of thousands. Dutiful sons, requestair parents in the sedistant lawis, and glad to contribute something from their own better fortune in this happy country, to the comfort and support of these who gave them feing; brothers remembering brothers and friends remembering friends, have long been southing, still send, and will always keep sent-ing. more book to them. For the test in ing, money back to them. Even the idea of in dependence for Ireland, entertained by no many of Ireland's sons, though a Clerky variable, his caused many millions of dollars to be sout to Ireland from America. Subscriptions to this content of the property of the content of the the money must fall into hands that embezzle it Americans, travelling in foreign countries, leave millions of dollars therein every year.

Third by the steet of sending money out of the country, here is none that does none, no not

But are we to be persuaded that it is wrong only for the Chinaman to do it, though he leaves behind him always the full equivalent in the product of his labor? It with hardly he claimed that the Chi raman gets anything without working for it, or that the labor he performs isn't worth the gromey he gets. His inbor is in neary all cases productive labor, or a direct source future production. The land he clears or drains will field crops for all time. Even on white working people avail themselves of the cheap working clothes which his patient labor effers them. The wife and mother, upon whom the family washing would fall as a beauthouse they are cheap. Is there nothing lin all this? For escript good reasons it must be admitted that the Chitese are not a desirable population. hough the chief objection to their presence lies opportunity it gives to brawlers to die e statement is absurd. When it is claimed they too statement is absured. When it is claimed that they are sending more money out of the country than other people do, or that it is a more wicked act for them to semigroup away than for other people to do they same, the talk is fit for the delirium of a blatant agitator's speech before a convention of the vagrancy of the coun-

ADVERTISEMENTS AND RATES.

Since it can't brog about the appearance of Since it can't brig about the appearance of its account to the bogus paper boasts of its coveriments. It is, indeed, printing a not of satisfactivements, persistently drummed for, at beginning rates,—rules fact no paper which is a newspaper and has a general circulation boald afford, or would look at. And advertisaments in a paper which is not a newspaper, which has both a paper which is not a newspaper, which has some and that obtain it the slow, are dear at any price. A paper like Than Canson and the which is not a newspaper, which is expanses for news, the amount of matter it on takes, the number of amount of matter it contains, the number of fersons it must employ, and the great consump-tion of paper which its circulation requires, can not accept as low rates for advertisements as a paper that rail be produced at less than one-lifth the rost, spends next to need ing for news, spread sout the little datter it cuttains in large type to save cost of composition and does not see that out the little fratter it cuttains in large type to save cost of domposition, and does not tree as much paper in six weeks as The Cas to tree does in one. Mad yet advertisers know that a paper which is sought for its news every day by every intelligent person within hundreds of miles, and therefore reaches all persons who buy goods, and particularly those whose custom is of most valid, is the changest advertising medium, thought its rates are necessarily from three to five times higher than those of the nethree to five times higher than those of the paper whose reafters are in proportion to the the germens of news and to its worthlessness as area of newly and to its worthesanes as a assumption. Therefore Time Oregonian, though could carry more advertisements that it love, bus no reason to coinclain of the state of its advertising business: Its advertisem sub-yield it more money in p single mouth than those of the News yield it in four; and the way the spends this money marks the distinction he-

iween the newspaper and the bogus journal!

Most people understand why advertising raises in some bewspapers are higher than in of Dut sometimes we find those who do not. It is a very simple matter. The real reason why ad-vert sements in one paper are worth more than In another, is just the same as the reason why is a suit made of genuine goods is worth more than a suit of shoddy. If The OREGONIAN would accept the rates of the Nagar it could double or treble its present amoun, of advertisements. So if any one of our first-rat knainese houses should offer its goods at or third of their present and real values, such house would at once increase its sales enormously, and the more goods it would sell the more money it won diloss. Just so with the advertising bus newspaper undertake to print two or three simes the smoomt of advertisements it regularly carries, at one-third or one-fourth of its regular nave if from bematopter, advantablement may be parent at very , our rates by a paper that is at

trifling expense for news and prints but small editions; but the advertising rules that would be priodiable to a paper disculating one or two thousand copies would be reinous to a paper disculating in the transfer thousand. Again, the circulating len to twenty thousand. Again, the news which a paper contains is the besis of its circulation; that news can be kept up only by large expenditure of money, and to gain and hold circulation the expenditure for news must be a constitute. non circulation the expenditure for new thins be a constant or increasing quantity. To pry for the news and the cost of publishing it there must be large contributions from adve tissments. If advertising rates are too low them will be no money to buy news; if the news is not clear them. not given there will be no demand for the paper, and consequently little circulation; and then advertisements inserted in it will is worth little or nothing to the advertiser. This business, like every other, adjusts under a necessary law of business. paper, particularly in a small city, begins with low rates for advertisements. It runs along from year to year—if it can hold out;—and, if it is managed with Judgment and has any real reason to exist, it gradually han one its rates for advertisements and increases its expenditures for news, -- the one process lependog on the other. This, in turn, begins to bring increase of circulation, and the paper slowly works up through years of pahyslaking erfort and cousiant attention to detail, to a basis of substantial basiness. This is the history of The ORI GONIAN and of every other successful naws-But where one haper achieves even derate success one bundred fail and are for

The newspaper is a business undertaking, pure and simple. It successful, it must be managed strictly on business principles, and no numages street on business in steel the rates for other. Newspapers that charge high rates for advertisements do not charge more than the publication of advertisements is worth in journais of their standing and circulation; for if they did, it would be easy to work other newspapers up to successful competition with them, whereas, in fact, nothing else is so difficult to do. THE OFFICENTIAN would take advertisements at lower rates if it doubt do so at 1 keps up its necessary expenditures for news and publication; for, like all other establishments, it is desirous of this office. desirous of doing all the business it can, in which there is even a moderate profit. But it cannot undertake to compete in advertising rates with pavers that do not furnish that have not one-quarter of its circulation and are published at less than one-quarter of its own ccessary expense. And it knows, moreover, that no paper will ener be published here, giving the news as it gives it and giving advertise-ments as wide circulation as it does, which will be able to publish advertisements at lower rates than it is charging now.

CONFICT LABOR BY CONTRACT.

The matter of contract labor as applied to the uritides of commin consumption is attracting much attention in: Fennsylvania just now. It is alleged that atout 750 of the 1200 inmutes of the Eastern penitentiary are being used in Philade phia. Of these some 500 are employed in weaving hostery and making clotherall of which unterial is utilized in making numents for the convicts themselves. Against this no objection is nrged, since the state, if it purchased in open market the clothian at the convicts, would get narket the clocking of the convicts, would get that of the very changest quality upon which no money is made. The complaint is against the employment of the remaining 300 in boot and shee and clair making. None of the men working in these lines are paid regular wages, and as a consequence the contractors are note o put their wares upon the market at less cost than is possible to production with any positi employs a receive fell wages. Recognizing such competition as unjust to free labor that mus-provide for like! Took and of thing and homes the legislature of Pennsylvania in 1883 passed r. law forlidding tabor to be bired out by tract in any form whatever. The concluding section of this law provided that all convicts, under control of the state and county officers engaged in manufacturing auticles for genera consumption shall receive quarterly wages again to the amount of their eardings, to be fixed from time to time by the officers of the institution. From such amount the heard, clothing and costs of trial for the convicts shall be deducted for the reimbar ment of the state, and the balance shall be p

to their families pr dependants. In case aone of these appear, the amount shall be paid to the convict at the expiration of his term of imprisonment. This plan, it is thought, will make one band wash the other in this matter of re straining criminals and keeping these dependent upon them from purpolism, and at the same time it is designed to protect free labor from a competition that is united. Other sections of the law declare emptratically that no convict labor shall be hirely put by contrast except upon the terms indicated above. From the com-plaints made and the facts stated in reference

to the employment of convicts, it is evident that to the employment of convicts, it is evident that law, unless enforce; is not a more certain panagea for the erils of contract convict know than for the personion of Sabbath breaking, gambling or whick selling.

With law and justice and popular sentiment

all upon their side, it seems wholly unnecessary for workingmen of Pennsylvania to make com-plaint before the public in this mother. Agita-tion of it is not necessary, as a domand for the simple enforcement of the law, made it a proper manner, would be sufficient to correct the evil. The case represents the very common practice of much bipsier and effort to secure a w, and the carelessness

A NAV: IN PROSPECT.

There is at last some ladication that the United States is to have a nary. The house committee on naval affairs has prepared two bills, one of which provides for the reorganization of the may and the other for the construction of the ships of war. From what has been made known of the work of the committee, it is inserted that the construction of heavy, expansive iron-clade, such as make the British invested foundable, will not be added the state of the construction of the construction of the construction of the state of the state of the state of the construction of the state of the s formidable, will not be advised, the medern fast cruiser, aimed with powerful ordinance au fast torpedo boats, being more serviceable. I the report of the committee shows, as it claimed that if will, addisposition to furnish the United States with a pary which will be adequate to the necessities of the country at home and of sufficient strength and power to communit the respect and wholesome fear of foreign nations, it will be all that is required. Costly iron-clade, that are this free jours supercelled in value by the inconfigurations. value by the inventive genius that is constantly engaged in the realin of improvement, are rati-er too expensive to buildulged by a nation that is free from the dangers that constantly memore monarchies. The definise of our vast seaboard, and the protection of our commerce in case of and the procedure is one commerce in case or need, are the chief requirements of a nay, and these the turedo iboats and fast cruisers will supply. Of meless war vessels, outdated and otherwise inefficient, the contry has an ample supply. The rotting bulks in the Brookign any yard, recently broken up for the bulkes that hold their decaying time ers on the stocks, are just as serviceable in their present strice, for all pur-poses of modern barai warfare, in they would have been had they been completed, launched and equipped, in good time. The nighty navy of Greet britain contains many ironclade, the construction of which was contemporaneous with the commencement of a number of unfinished vessels in the may yards of the United States, and which have long been made obsolete by busy invention and constant improvement. Resistance to blows while dealing blows was the chief feature in the inception and construction of heavy ironclads. Following their construction speedily came an improvement in ordinance, before which the heaviest armor was defenseless. Hence the decision in favor of vessels that, while carrying lestructive ordnance, are swift both in the pursuit of an advertary and in getting out of range of its guns, while to torpedo boats is del-

Should "Nat" Baker and "Al," White be sent peet, they would have a chance to become "workingmen" for the lirst time in their lives,

egated the defense of harbors and the auxiliary work that makes a navy effective.

THE PIONEER REUSION.

The annual reunion of Oregon pionders will The panual reunion of Oregon glonders will be held in Oregon City in June. It was held at that place has pear, but the weather was easily the held of the city were not satisfied with the attendance while hier, own part in the exercises was not what it want have been under more favorable circumstances. For these, among other research heer, among other reasons, they desired that the reunion be again held there, and the board of directors of the Pioneer association aecided in accordance with their wishes, A ploneer town, closely associated with the history of territorial days and beyond many marries of the fast fading pioneer era, linger are ind Ore con City. egon's early history reposes in the cometery on the short beyond the town, and many of their decendants, and a few of the r associati reside in the old city by the fells. ertainly be no more appropriate place Weat ier being favorable the attendance will doob less be large, the hospita ity of the citizens boundful and the welcome accorded to their

The Scattle Chronicie, in printing out a few days ugo the uncessury vigitance that should follow the raising of martini law in that city, to prevent a recurrence of discrete, signifi-cantly says: "The authorities m let have this tiot business so entirely in hand that a repeti-tion of this trouble will be impossible. A strong police force of trusty men should to backed by proper ordinances which will enable t to put own the first indication of an arthresk suc se meetings where hot, excling language is used. These meetings have been the root of all this trouble. Called, apparently, for a patriotic illurpose, they have been addrawed by men who used the mest feditions and incendary language." From this chapter of Scattle's bitter experience the few men of ord narily dec slincts who have been beguiled into giving the endorsement of their presence to the meetings in this city, where "seditions and incenjilary in this cut, where sometimes and design of wis-language is used? may learn a lesson of wis-dim. Possibly, also, the authorities here night learn a valuable lesson from the suggestion reladeclared to have been the "root of all the trou-

A writer in the Seattle Post-Intelligeners, ovidently a lawyer who has devoted so be time in looking up the so yet, says the celebrated case decided by the saprene count of the United States, known as "Ex parto Milligan," which who the the same of the same in the country of the the who cited by the congress of vagrandy-lately as-semilled at Portland, does not support a single proposition announced by that audacious as bir. This, he says, will be mannest to any one who will carefully und the case. B. F. Butter was special counsel for the government in this case, and exhausted all of his great powers in an argument to show the rightfulness, the con st futional validity and justice of that militar tral and condemnation

The terminal city of the Canalian Pac fie has been located at the mouth of Burtard inlet, about twenty miles beyond the present termi-nus at Fort Mood, and has been name! Vancouver. The extension will be justed raidly and fluished by the middle of the sear. The construction of wharves, depot luillings and other facilities for the accommon ution of tualic will be begun in a short lime, and will make times lively and work plenty for a few months To run after a terminal city boon of a mining excitement is about equally unwise. A chapse that brings disappointment, if not distress, to many, to the sure result.

Civil authority is supreme again at souttle and, with troops at hand, is equal to the situa-tion. The police has been reorganized under a new schminstration and is under a rightant dis-cipline. The spirit of disorden is still high, tew situmistation and disorder is still high, copine. The spirit of disorder is still high, however, and it is thought that removal of the troops would be followed by another his-odyrict. The presiden has been asked by timeter-ritorial authorities to leave a sured force it Seattle for an indefinite period, and it is exist that Gen. Git bon has joined in the recommendation.

"Col." Hamilton of the News says that his epineliment on the committee of fitteen (to lervaize the Chinese) was made without his consent. Good, so far; but he should have stated distinctly whether he approves the purposes for which that committee the should have stated distinctly whether he approves the purposes for which that committee was appointed, or not, and whether he thinks it the decent, proper, lawful and rightful thing for the committee to go on that errand, or not. Hood's Barsaparills is purely vegetable. It does of contain any injor our lagredient.

TIRE IN CHINATOWN

Two Brik Builfings on Second S rect between Yambil and Lavlor Got.ed

A' out o'clock his morning fire broke o' to the reat of a two story brick building No 1 I second street, nea Taylor, occupied by he Ark & Co, dealers in Chinese goods. When aret discovered, it had gained great headway, and deuse volumes of smoke were rolling through the back windows. Policeman Mott turned in an altern the late. The latest head warm were alarm from how 12. By this time is mess were herstring through it is not. The engages and hose compaties responded promptly Very soon it frames communicated to be new theater builting adjoining on the south and soon it was a mass of fame. A second alarm was turned in from the same box. A lizen streams were prured in from every side, he fire being con linely surpoun led by the department for a time 1; wils hought the three story builting adjoining the thea or on the south would go but it was saised infleen minutes steady work, during which

time an immense unount of water was thrown not the buildings, brought the fire practically under control, though a required the present of the department nearly an bout.

The building in which the fire broke out was

The building in which the fire broke out was owned by Ura H. Lavin. It was simply four brok walls talk around a frame dwelling. It was it sure if on \$1000-reports I in the Union and the Oregon II. re and Marine.

The theater baiding is said to belong to the Stewart estate. Damings to both buildings is about \$000.

There is no way of estimating weat the danage to the several stocks in \$700 the has \$1000 and the fire state in the restaurant above \$1000 arks store.

The fire states. In the restaurant above he Ark's store ark's store of the Taylor street end of the I ark's putating, the heroic work. How they withstood the deare volumes of smolle and tames it at envalues them is almost a mystery. They should mufully at their posts, however, allhough the spectators expected then it fall overy minute from suffercation, as the heal must have been means. For a time their forms would not be prespitable but a non-cettait riley could be seen towering it the dense bin layer turns, hose in anul. Whe the freshold be soften under con-rol they disconded on their alders.

NEWSPAPERARCHIVE®

THE SWAMP LANDS.

Examination of the Subject by Hon T W. Davenport, Senator for Marion County.

Methods by which the Lands have been Acquired by Speculators-Frauds both upon the State and General Governments

SH VERION, Feb. 20 Soon after my election to the state senate in 1882, letters began to arrive from those portions of the state contaming the swamp land districts, asking me to do something to relieve the set lend there from their trouble, which they were inclined to attribute to the wrongful action of the state officers charged with the managemen of the swamp lands. Up to that time I had been quietly in the possession of the opinion that the act of 1878 bad done all that was possible to do in correcting the abuses that had grown to such prominence under the act of 187), but I soon became convinced by letters and affidavits from persons of known intelligence and fruitfulness that the abuses complained of during the administration of Gov (refer are even worse under the administration).

the administrations of Govs Thayer and Monday
To ascertain the existence of disprisar and
wrong may be quite said, to find a romady
which will give relief to those afflicted is generally much more difficult, and I found it some that I did nothing diring the seed not less, and even at the nothing diring the seed not less, and even at the next regular seesion of less, is could think of nothing better than a thorough investigation of the whole matter from the passage of the act of 180 up to the end of the

sage of the act of 1870 up to the end of their thirteenth regular session

A PROPOSED 1871-9110-ALION

Accordingly, on the Tath of January Finite-duced a joint resolution, S. J. R. N. 12, unsured ing the committees on public lands of the two houses to make such presengation, and regula-lefter the end of the session. The resolution

was unanimously adopted by both houses on

that day

The committee had a np.s powers cound em play competent lega falont, experts, six and smy with the Kin Henry Wairen as chairman, and two members from the swamp land counties, expectally interested, their seemed to be a fair prospect that the legislature would be it cought; informed upon swamp land matters in time to pass needed legislation.

pect that the legislatuse would be if a oughty informed upon swamp! and matters in tirie to pass needed legislation.

Unfortunately Mr Warren became sick accordance to the committee was not filled until near the nide of the committee was not filled until near the nidele of the sessiph, by which very value bie time was lost. Purthermore, the member of the committee he ng fully employed in the ordinary routine of legislation, were compelled to rely almost solely upon their clerk, who for some reason did not appear to comprehend exactly what was wented, and in consequence when the committee net in the last week of the resistor to make up their report, they found to their great chagrin that the material collected was hearly worthless as respecting the objects named in the joint resolution, and that therefore no satisfactory report could be made within the time specified. Frough, however, had been learned by the committee to convince them of the propriety and duty of continuing the investigation, and on the 17th of kebruary, three days before the adjournment, they reported through their chairman senate joint resolution No 11 when the senate is not a subject of 27 to some in the house, if e others being absent the next day, February 18th, on motion of Mr Rinehart, senate joint resolution No 11 was recommitteed by a vot of 23 to 8, and so ended the lovestigation. Those volting to recommend, and therefore stop tavestigation, were Hilyen. Hurch, Carson, fauthern, Coleman, Dorris, Haines, Hail, Hirsch, Hoult, Miller, Penning 100, Frim, Reed, Rimehart, Shipe, Siglin, Simon, Williams, Wildow-20 Those volting against were Allern, Cartweight, Havenport, Emmit, Hare, I ee, Myers, Weatherford, Voorhees-

THE INVESTIGATION TO CONTINUE THE INVESTIGATION TO CONTINUE.

The said resolution, after reciting the facts showing the imprac leability of reporting at that aession, gave reasons for continuing the work, as follows:
WHEREAS Certificates have been issued to large and vanishte tracts of lands not the least account the legislatic assumbly and others will perhaps to asked for her re another seesal of this body and

WIFEFAS There are graved out is in the minds

Ine committee was costru tell to report to the extretary of state who was ordered to have so expres printed for the inject the legislature and state offices. I write the expectation of the second luring the system that a maintier had seen out

I uring the scalen that maintachait are vent monerous affidavits from old residents in the eward) and districts, stating that patents but her issued by the state officers of lands that were not swamp lands, and that in all cases where patents had been given covering real swamp inds there had been given covering real swamp inds there had been no lustinge of reclamate nor any attempt at reclamation as provided by law and when the committee state, as a reason for continuing the investigation, that they had "graine doubts whether the state officers had followed the law or acted a pullat is then were very moderate in the expression of their opinities."

As a specimen of these attidavits, I here give

AFTIDAM OF JRSS) (ABRAN)
I am resident of what is known as the I were kine it began in Ramathe ants Ore, or and have resided in this vicinity with the exception of the or two short inferrals since Judy 1st. I first located upon the west sade of the klain afterior in set 2, 1 for 5 of k. F. and Justle bold mannader lines but subsequently sold rily 1 extro 1 the first lines to the klain and plant for the street of the klain and plant for the street of the model of the control thought two perfects dry at the time. In A just 1st. I as now as the first some levels may be to dead on I have with the control of the mirrors.

As a specimen of these athiavits, I hore grow one from the Horn O. A. Sterring County of klamath. State of Dix on a part of the state of the state of Dix on a part of the state of the sta teading of an affidavit presented as proof of the chanation to the state board by John 1 Miller of landsembraced in criticate of eale and teration of landsembraced in criticate of eale and teration of landsembraced in criticate of eale and teration of landsembraced in and undoubtedly proves in the man and undoubtedly proves in the man and in twas indended to prove a State of Orgon County of lake. We ff M. Thatbor, George Nurs and J. In County and state is hing fully sworn distant to the first man and the state of the st

grues, the Cereals or regulations for three years, stall the considered as fully reclaimed within the meaning of this act!

I anguage cannot be planner and there cannot be a doubt in the minds of the state board as to their duty in the remuses. Not one of them lut knows the rieman gof the word cultivation that it means lithage plowing by truining of the soil that to dufunte land in grass, means to p! wand prepare the soil and sow grass not out of them but knows that cutting wild grass upon a swamp, whether done for three year or forty years, is not cultivation in the meaning of the act of 18-Do any other act, but that it is a mean resulterfuge an evasion.

The successive state boards have probably been of the opinion that the legislature of 1870 was in error when it required any reglamation of the swamp lar de of Eastern Gregon, but that does not change the duties of the board. The board examot feg slate; it must obey the leavest does not change the duties of the board. The board examot feg slate; it must obey the leaves of the form of the legislature, if it be an error was not a mere it advertence or cloud thin 114, entirely inconsistent with other partitions of the act, lat it was one founded upon usual tent in whedge of the soil jet. These arms for my lower of the leaves of the form of the leaves of the form of the formed provise in would have to be made for trip, ating them it pleasure. The pinule of our dwn stat, many years ago made that the swamp and over lowed lands aft is stat; should be seed in a soil that the swamp and over lowed lands aft is stat; should be seed in a fact of which and over lowed lands aft is stat; should be seed and a soil that the swamp and over lowed lands aft is stat; should be seed and soil that the swamp and over lowed lands aft is stat; should be seed and soil that the swamp and over lowed lands aft is stat; should be seed and soil that the swamp and over lowed lands aft is stat; should be seed and soil to state of the first and over lowed lands aft of the should be seed to be

two band marks montained and on or about the parallel of 12 de crees a manute north lattit left and the said 11 dh d greej of longitude. This would have given the board and the public ample of the as to what hand was intended. The lattic is called with 1-reso lattle corrections 13 the critical paints or intended at the description and by the rules of construction the uncertain point on of it should be rejected.

The land is cluding the swamp or lake, as we undersland, is the same it clue ell in the supplemental ding of Owens and which contrained only as and number of acres as compared with the longitude stimate, only though a sufficient of the same in the same that the lattic is the same that the same which contrains only a small number of acres as compared with the longitude estimate, only these solutions.

The successive state bounds have probably been of the symmy ind of the Eastern Greyon, but that does not change the dunes of the bound. The bound summer of the symmy ind of the Eastern Greyon, but that does not change the dunes of the bound. The bound summer of the bound of the symmy individual to the foregoing opinion of they with some formation of the symmy individual to the control in the control of the symmy individual to the control mean in the foregoing opinion of the with some of the symmy individual to the foregoing opinion of the with some of the symmy individual to the foregoing opinion of the with some of the symmy individual to the foregoing opinion of the with some of the symmy individual to the foregoing opinion of the with some of the symmy individual to the foregoing opinion of the with some of the symmy individual to the foregoing opinion of the symmy individual to the foregoing opinion of the symmy individual to the foregoing opinion of the symmy individual to the symmy individual

important Topics Discussed-The Recadey and the Evening Revival Services-Meetings to Olosa Friday

The convention met in Taylor stree church at 10 o'clock, a large anchence being present. The first topic, "Best Methods of Organizing and Poshing Church Wolk," was opened by a paper front Rev. N. I. Cobleigh of Walls, Walls, read in his absence by R-r. Dr Atkinson The folowing are brief notes of it

lowing are brief notes of it.

The greatest necessity exists for organization At the beginning of the year not only should a church meeting but a social gathering be held at which time the affairs of the church should be the topic of conversation. The paster should receive warm welcome and a hearty support in his work. A warm welcome is worth more than all logic of the soluble Committees on all important affairs should be organized only those who are efficient and faithful being appointed upon them. The greatest care should be given to select to of chelir, junior, sunday-schee teachers, and only in the order of three callers that only introduced twife or three the Teachers that only intending the properties.

let u not choir, janitor, Sundar segrent to seeir Teachers that only attend twice or three
inrea month should be dropped. Personal
wo kebould receive that greatest attention. The
solider spirit should assignife all.
I say it. Althreot gave the second super on
the topic. Material matters are only motionia.
A church work may passt without churches,
eir. Our great head at an example in the re
spect. The soul must receive divine truth must be
tan bt, nothing beyond that, nothing short of it.
Or, anization existed during thirst syminetry,
simple, but effective. The missionary spirit
must exist and hear trut.
At the circle of the paper let Municipied.

BIBLE BLADENS

Service opened. The requests for prayer were read by Rev. J. Q. A. Henry, and "Coronation" was sung. Dr. Monha I's subject was "Prower and Sufficiency of the Word of God." He said In Rev. Exit. 18, we find his word is a nificient. Luke yet 31, If they will not hear Meses and the prophets neither would they believe were one to rules from the deat. In Her. xxil. 29, we find that God's word as to be faithfully told. Heb iv 12, A hummer is break, a fire to consume, sharper than a two-edged sword and discerns the thoughts and anients of the heart. The word is all powerful. A man thoroughly educated in worldly knowledge is no more fit to teach others in apiritas! truth than a dead man. Knowledge fits us to be master builders but is an eservient to spiritual life and is only useful in saving man, when used to help us entiestand tools word. In II Abron xvil. 9 we find the people curried the hook with them. We should always go armed, equipped for service. When you want to hay your children a present, buy them a tible. The word is to be hid in the heart. In Josh, if 8 we find the measure of our success is according to our knowledge and skillfulness of food's word. BIBLE BLADING

The state of the s

his to a marked extent, in some particulars at leasts. For instance, they ejected as charman of one of their most important committees. We of they rate used to make beer money in government employ, and who he known at a forted in the city just \$12 worth, with other botels and the bar-rooms to be heard from this fellow Thayer must not be confounded with any decent man of they name in the city. He wears a Grand Army badge, won as a blacksmith during the war. His struggles shoeing greatment mules were tramendous, and he has been thred ever since. His determination to expel the Chinese is from principle. He make a iving for some time by catching suckers and pedding them among the Chinese, but as his wife supports the family by taking in winshing, he has concluded to sacrifice his trade for her benefit. Hansen also owes a bill for board at the same bote of some \$25. Martin 6 criffin, late president of the anti-Chinese grand council and "Manage" of the Paufic coast department of hel Mutual Reserve Fund 1. fe association, of Naw York," was an excauser from the Merchant hotel, owing a bill of nearl, \$200, which still remains unpaid. The others of the leaders are of the same stripe, and should be exposed, so that decent men may know who they are

The lecture room for the social science course was quite filled pesterday evening by an appreciative audience, to leten to Miss & to N Topper, of the High school, whose amounced theme was "Secondary (auses of Alopnoism". From the first work to be linst the speaker held the closest attention of her hearers, and her lecture abounded in apt sentences, expressing her compact thought. There was a subdued enlikusion, and sure to win its way with overal resuading to the conclusion that a burdhor of the first was on the speaker's mind, seeking chitestones, and sure to win its way with overal thought between Wine and in more at this in ell in entire that who have fraidly described in prisit. There was a fundamental that a burdhor of the time and touching overs theart in ell in entire to the conclusion that a burdhor of the time and the speaker's mind, seeking chitestones, and sure to win its way with overal thought it between the speaker's mind, seeking of some future day that the whole paper in y be in prisit.

Miss Tupper begin with so honely at temps as "bisd food and cooking, showing how great a cause for cracing simulants this American kittless it cle price time."

Myrich is a first to it is the fill with the did not price of 1 the tour the did not propositive file in the contains of the burder of the mind and the propositive in the close time in the did not be propositive in the contains and touch the propositive in the contains and touch in the fill that the propositive in the contains and the fill in the price that the propositive in the contains and the fill in the propositive in the contains and the fill in the propositive in the contains and contains in the fill in the propositive in the contains and the fill in the propositive in the contains and the fill the contains and the fill in the propositive in the contains and the fill in the propositive in the contains and the fill in the propositive in the contains and the fill in the propositive in the contains and the fill in the propositive in the contains and

by the holding beyond that, nothing short of it.

Or, anization existed during thrist, aminety, simple, but effective. The mesionary spritt must exist and hear true. It mesionary spritt must exist and hear true. It must be an expensive and the true already of the paper. It will be an expensive and the true already of the paper and the content of the holding of the true and the content of the holding of the content of the holding of the content of the holding of the true and the content of the holding of the content of the con

nound handships nections to the purmey, we competed on the UMATHIA ARLER.

Where an incident happened, although intended for a lock, that came near proving a very serious affair. It came at our in this way - In the evening about an bour by sun a soung fagues chief came into camp, and seeing a young lady about 17 years old and rather good-looking asked her mother, what she would take for the "white e junw," as he designated her hot thinking of the consequences and wishing to loke her daughtler, she replied that he posis have her for 100 horses, and he said he would bring them the next morning. We had in our train a man by the name of Bradshap, who had come to our train on the phones and who had content to our train on the phones about who wished to travel with us, and who had followed trapping for several penrs with the American Fur company said was theroughly contenant with the Indian customs and char cast. The loke was told to him at the evening mean, and he took a very sections that for some time evinced a decided spirit of heart up to the immigrants. He immediately arged that the train start is least an hour earlier than usual, and that the men she ind guard each side of the train and thous be prepared to reast any attack. The guard were meatine or training the fourt in the wayons. At somes the tamp and thus be prepared to reast any attack. The guard were meatine or training the fourt in the wayons. At somes the time in the wayons at somes the time in the wayons. At somes the time in the wayons at somes the time in the follows, having the firm of the out for the joing that it is found that white spine the follows with a large drive of horse, having it the lock and there would have already whith a pine of the china way only a loke, but the linding was in dearned, and so persistently and tooutingly in assist, that Budehaw knocked him down, and if it hal not been for the the indian dwas in dearned, and so persistently and tooutingly in astred, that Budehaw knocked him down, and if the lind he was the contraint
